Dear Friends, Family, and Supporters,

It is with heavy hearts that we reach out to you during this incredibly challenging time in our lives. Our world was turned upside down when our beautiful twin babies, a boy and a girl, arrived much earlier than anticipated. We share our story, a tale of loss, resilience, and the fight for survival.

**A Bittersweet Beginning:** Our twin babies, a boy and a girl, came into this world as tiny miracles. However, our joy was tempered by the heartbreaking loss of our precious baby girl. We mourn her every day, even as we find strength in the resilience of her surviving twin brother.

**Survivor's Fight:** Our little warrior, the surviving boy, underwent a crucial surgery to stabilize his fragile condition. The surgery on his tiny stomach was a lifeline, and we held onto hope as he navigated through the early challenges of life.

**Struggling to Breathe:** Despite the initial stabilization, our son is now facing complications with underdeveloped lungs. Each breath is a battle for him, and the medical team has advised a second surgery to address these critical issues. His survival depends on the success of this procedure.

**Reduced Platelet Count and Ongoing Medical Struggles:** In addition to the respiratory challenges, our little one is grappling with a reduced platelet count, requiring constant medical attention. The doctors emphasize the importance of placing him on a ventilator in the Neonatal Intensive Care Unit (NICU) for the next 8 to 10 weeks to give him the best chance at recovery.

**Supporting Our Braveheart:** The emotional toll has been immeasurable, and the financial burden weighs heavily on our shoulders. We turn to our community for support to ensure our surviving son receives the specialized care, medical attention, and equipment needed for his journey to health.

**Be the Beacon of Hope:** We have created the "Twin Miracles: A Journey to Hope" crowdfunding campaign to rally around our little survivor. Your contribution will directly impact his life, covering medical expenses, ongoing treatments, and the essential care he needs in the NICU.

**Donate:** Every contribution, no matter the size, makes a difference in our son's journey to health.

**Share:** Help spread our story on social media, through email, and in your community. Your reach may connect us with someone who can offer support.

**Keep Us in Your Thoughts:** Your positive energy and prayers provide strength to our family during this challenging time.

**Gratitude in Grief:** In the midst of our sorrow, we are grateful for the support and love

we have received. Your kindness sustains us, and we believe that, together, we can provide our surviving son with the chance to breathe, grow, and thrive.  
Let's be the Beacon of Hope for Our Survivor!

Mother Name : Priya

Father Name : Santheep

Hospital : MIMS, Calicut  
(Malabar Institute of Medical Science, Calicut)

Ward : NICU  
(Neonatal Intensive Care Unit)

Child Problem : Immature Birth, one surgery has been done in stomach to make stable, now suffering with issues in Lungs to take breath, reduce in platelet in blood, as per doctors as a part of treatment baby should be in Ventilator in NICU in another 8 to 10 weeks depends on health conditions
